

10820991R - Monochrome slot FBT

Round type diam. 23 mm

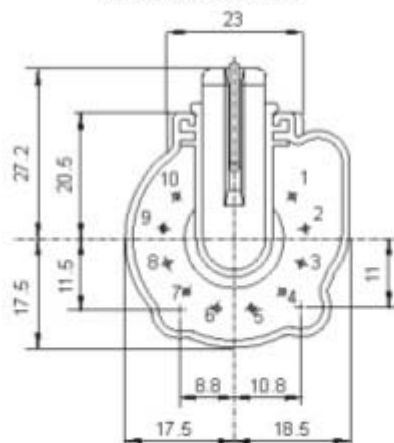

This line output power transformer series has been developed to provide the required scanning amplitude and EHT for the most popular monochrome tubes. The line frequency between 15 and 32 KHz makes it suitable for CCTV and medium resolution data graphic displays.

This type with the horizontal chimney has a plug connected for the EHT cable. The external connections are made by 10 Pins which are directly solderable to the PCB.

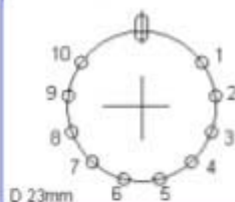

The magnetic core may be connected to ground by means of a special spring. This series is intended to be used in conjunction with the following Eldor Deflection Yokes series 301, 307, 310.

This series is designed in order to meet International Safety Standards.
